Article 30.

Nothing in this Declaration may be interpreted as implying for any State, group or person any right to engage in any activity or to perform any act aimed at the destruction of any of the rights and freedoms set forth herein.

VALUE EDUCATION

“**Education** is the most powerful weapon which you can use to change the world,” as Nelson Mandela said. It helps people become better citizens, get a better-paid job, shows the difference between good and bad. **Education** shows us the **importance** of hard work and, at the same time, helps us grow and develop. **Value education** is expected to bring about a new sustainable way life.

Value education is the process by which people give moral **values** to each other. explicit **values education** is associated with those different pedagogies, methods or programmes that teachers or educators use in order to create learning experiences for students when it comes to **value** questions.

VALUE EDUCATION

- Value based education has a very significant role in providing proper direction to youth to inculcate positive attitude and to teach them the distinction between right and wrong. It teaches them to be compassionate, peace loving, helpful, generous and tolerant so that they can move towards more harmonious, peaceful, enjoyable and sustainable future.
- It is crucial to the retention of national identity, peaceful and harmonious society. Education should give overall development of the student personality. The main of education is to produce citizens with sound character and health.
- Good citizens are the only hope for the progress and prosperity of the country. Life based upon good principles is an essential requisite. Therefore, moral education should be included in the school curriculum.
- The curriculum should provide enough opportunity for pupils to acquire a considerable amount of knowledge that is essential for morally responsible living in our democratic society.
- Value education shall prepare individuals for participation in social life and acceptance of social rules. Schools should provide a healthy environment for sharing responsibilities of community life and relationships.

Objectives of Value Education:

- a. To improve the integral growth of human beings.
- b. To create attitudes and improvement towards sustainable lifestyle.
- c. To increase awareness about our national history our cultural heritage, constitutional rights, national integration, community development and environment.
- d. To create and develop awareness about the values and their significance and role.
- e. To know about various living and non-living organisms and their interaction with environment.

Value Based Environmental Education:

1. Human Values: Preparation of text-books and resource materials about environmental education can play an important role in building positive attitudes about environment. The basic human value 'man in nature' rather than 'nature for man' needs to be infused through the same.

2. Social Values: Love, compassion, tolerance and justice which are the basic teachings of most of our religions need to be woven into environmental education. These are the values to be nurtured so that all forms of life and the biodiversity on this earth are protected.

3. Cultural and Religious Values: These are the values enshrined in Vedas like 'Dehi me dadami te' i.e. "you give me and I give you" (Yajurveda) emphasize that man should not exploit nature without nurturing her. Our cultural customs and rituals in many ways teach us to perform such functions as would protect and nurture nature and respect every aspect of nature, treating them as sacred, are it rivers, earth, mountains or forests.

Value Based Environmental Education:

4. Ethical Values: Environmental education should encompass the ethical values of earth-centric rather than human centric world-view. The educational system should promote the earth-citizenship thinking. Instead of considering human being as supreme we have to think of the welfare of the earth.

5. Global Values: The concept that the human civilization is a part of the planet as a whole and similarly nature and various natural phenomena over the earth are interconnected and inter-linked with special bonds of harmony. If we disturb this harmony anywhere there will be an ecological imbalance leading to catastrophic results.

6. Spiritual Values: Principles of self-restraint, self-discipline, contentment, reduction of wants, freedom from greed and austerity are some of the finest elements intricately woven into the traditional and religious fabric of our country. All these values promote conservatism and transform our consumeristic approach.
